## AllBooks Review

Cheryl Heinrichs

Richard W. Morris

Genre: Fiction/Religion (Critical Thinking)

Title: **God on Trial**    *A Courtroom Novel*

Author: **Richard W. Morris**

*The truth shall make you free. John 8:32*

Can the age old questions, "Is God real?" or "Who created God?" be answered in the twenty-first century? Is it true that most humans are ignorant of the discrepancies or contradictions within the Bible? Are most believers in God & his Son oblivious to the approximately two million innocent people put to death by God's order and documented in the Bible? In the name of religion, hundreds of millions of people have died all believing they are right. Only a strong, open mind can answer the other question presented in this novel, "What do I know and how do I know it?"

Following a new city ordinance banning any form of blasphemy, David Stone announces he is a non-believer at a public Sundown Service. David, philosopher/teacher is idealistically driven by his belief, that a world could be created where people use their intellect to overcome their ignorance; therefore no longer believing in superstition or unfounded beliefs. After surviving his horrendous experience, overtaken and beaten by a mob of 'church going people' and the law, he staunchly stands behind his opinion, forcing the courts to prove that God exists by using the Federal Rules of Evidence. His contention being that there could be no law or even the word blasphemy, if the courts could not prove God's existence.

The story gives an explicit view of sexual power and participation behind the Pastor's door. Sister Leah, Mistress of Justice has the Pastor right where she wants him, literally.

We are enlightened to the purpose of murders, and why the trial was prolonged, manipulated by Church and State. Massive amounts of money and power are competed for and obviously necessary to support the church as well as the upper echelon's luxurious lifestyles. These schemes are well thought out by people in power with very dubious pasts. I was particularly amused by the thought of a paid prayer drive-thru. No doubt one already exists or if not, soon will.

My vocabulary skills were challenged as I embedded myself into the author's thoughts. Pay particular attention to the trial as the defense weaves through a maze of scriptures continuously being excused as a matter of interpretation or with no intelligent answer at all. Remember this to be a fictional novel, despite how the scriptures line up with courtroom testimony. One must be secure in their own beliefs, open minded and definitely not 'prissy' to appreciate this author's pen.

The author, Richard W. Morris is a licensed lawyer in two States and in England. He is a member of Mensa as well as having a diversified past, holding other licenses as well. It is obvious he has integrated his internationally acquired knowledge of law and religion as your inquisitive juices begin to flow by the time you get to Dicksburgh. **Very Highly Recommended!**
